Chemical GW concentration contours 38443-74(028)-030714.pdf
38443 Project Schedule-030714.pdf

Hello Leslie,

Please find attached the TCE, vinyl chloride, benzene, and cis-1,2-DCE groundwater concentration contour maps revised to show the entire Site.

Also attached is a revised Project Schedule, with a Risk Assessment Framework deliverable added (page 3).

CRA is upgrading the program with the Site data. We anticipate being able to provide copies of the program in the last week of March.

Thank you,

Valerie

Subject: SDDL map request

Adam,

A week ago last Friday we talked about getting contour maps of groundwater concentrations that show all of OU1, and copies of the program with the site data. Do you have a sense of when those will be available? I think the maps will be useful now for discussions about the OU1 work, and looking ahead, even the chemicals that we determine are not COCs for groundwater should be mapped and included in the RIFS to support that determination.
